Mr C Spedding
Project Manager
Barfoote Construction Limited
WHANGAREI

Hi Colin

Now that calving is over and the season is in full swing we would like to take this opportunity to thank you and your team for the excellent job that Barfoote Construction Limited have done building our new dairyshed.

From our first enquiry, Trevor Barfoote and the then project manager, Mary Easterling, were promptly on site discussing options and taking us to visit other dairysheds that were of similar design to the one we envisaged for our situation.

Your team dealt with the shed design and the associated permits and consents quickly and efficiently, keeping us fully informed of progress at all times.

The building construction team, ably led by Jake, and including Brent, Conrad and others, and the structural steel team, also well led by Darren and supported by John and others, we found to be friendly, skilful, co-operative and willing to offer advice on improvements and additions that their experience suggested could be to our advantage. They co-ordinated and worked in very well with all of the suppliers and subcontractors involved. It has been a pleasure to work with your company, and we now have a facility to be proud of and which continues to attract many positive comments.

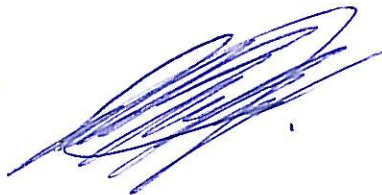

We were recently talking to Mrs Kim McCahon, who with her husband Max have recently commissioned a new dairyshed, also built by Barfoote Construction on their farm at Te Kopuru. She agreed with us that your teams' workmanship and co-operation were second to none.

If in the future we require construction work done, we will not hesitate to contact your firm and would highly recommend other potential customers to do the same.

Please feel free to bring such clients to view our facility.

Kind regards

L/Ballen H.P. Ballard
